Introducing a range of proven mobile accessories that allow you to customize your DuraForce Ultra 5G UW for your specific needs.
DEVELOPMENTS HIGHLIGHTS

- **Embedded with Qualcomm® Snapdragon™ 765G Mobile Platform Chipset** — the DuraForce Ultra 5G unites 5G and AI to provide multi-gigabit speeds, intelligent multi-camera capabilities and the ultimate in gaming entertainment, all while preserving battery life.

- **Rugged, Waterproof and Drop Proof (up to 1.5m onto concrete)** — Certified IP68 dust and waterproof.¹

- **Stay Productive** — Glove and Wet Touchscreen Operation², enhanced Enterprise Grade Wi-Fi® for VoIP, and Wi-Fi Calling.

- **Built for Push-to-Talk and Push-to-Responder services** — Dedicated oversized side button, loud dual front speakers, powerful battery, support for PTT accessories like headsets and Remote Speaker Mics.

- **Protection in Hazardous Locations: Non-incendive Class I, Division 2, Group A-D, T4** — Certified for use in classified hazardous work environments where concentrations of flammable gases, vapors, or mists are not normally present in an explosive concentration (but may accidentally exist).

- **Two-year Standard Warranty** — Made with Japanese quality and precision, and backed by Kyocera’s standard two-year manufacturer’s warranty.

- **Sapphire Shield™ Display** — Second only to diamonds in mineral hardness, sapphire is virtually scratchproof and provides outstanding protection against impact damage.

- **Security** — Biometric authentication via facial recognition or fingerprint sensor on the power button, and enhanced security features utilizing FIPS 140-2 validated module, ensures your DuraForce Ultra 5G, and the information on it, remains secure.

**DEVICE SPECS**

**DuraForce Ultra 5G UW at a glance**

¹ Certified waterproof for up to 6.5 feet (2 meters) for 30 minutes. Before immersing your phone in water, make sure all ports and covers are properly seated, with no foreign objects obstructing the seals, to maintain the waterproof capability. The phone should never be used under water with a broken or open SIM/microSD slot cover (located beneath power button).

² Water in the phone’s open microphone and speaker ports may affect outbound audio quality and speaker performance. These are temporary conditions and will subside once the phone is dry.

³ Recognizes touch input while wearing gloves up to 3mm thick; the material, texture and thickness of the glove as well as how it fits your hand will impact performance. Individual results may vary. Not available in 2G GSM mode.

⁴ Talk and standby performance may vary based on user settings, feature use, and network.
