

# DEVICE CONTROL MOBILE DEVICE MANAGEMENT

Control feature access on devices and increase productivity of your workforce.

## ABOUT DEVICE CONTROL

Device Control by Kyocera is an ideal mobile solution for businesses with small device pools where cloud-based device management is not required. The application provides control of device features without any monthly recurring charges, improving your business's bottom line. With Device Control, your employees have access to critical business apps. Once a Device Control policy is created on one device, it can be easily transferred to multiple devices so to reduce/minimize the group device configuration effort.

## FEATURES:

**DEVICE FEATURE RESTRICTIONS** – Limit or allow device capabilities to those needed for the job.

**APPLICATION MANAGEMENT** – Restrict list of applications supported or allowed on device.

**CONTACT MANAGEMENT** – Limit access privileges to designated phone numbers for incoming/outgoing calls.

**KIOSK MODE** – Limit access to features that interfere with workforce productivity. Block applications and device capabilities not conducive to the job at hand.

## DEVICE CONTROL FOR FEATURE PHONE

Device Control is intended to support specialized business processes by allowing you to restrict or customize specific functionality. Once a Device Control policy is created on one device, it can be easily transferred to multiple devices so to reduce/minimize the group device configuration effort.

## SAMPLE CUSTOMIZATIONS\*

**Walkie-Talkie only Mode**

**Remove unwanted specific applications**

**Talk & Text only Mode**

**Disable unwanted features**

**Restrict incoming or outgoing calls to designated phone numbers**

- 1. Restrictions for Cellular Services
- 2. Restrict Contact List
- 3. Restrictions for Incoming Calls
- 4. Restrictions for Outgoing Calls

Rapidly deploy multiple devices by using a QR code to copy configurations.

Once a Device Control policy is created on one device, it can be easily transferred to multiple devices so to reduce/minimize the group device configuration effort.
